1. Attached is the Committee on Imagery Requirements and Exploitation (COMIREX) report on high-altitude photographic coverage of Cuba for the period 7 July - 31 August 1969, which is circulated for the information of the United States Intelligence Board (USIB).

2. COMIREX advises that the USIB requirement for about 90% area coverage and for target category sampling over this 56-day period was fulfilled. Also during this period no activity was observed indicating reintroduction or deployment of offensive weapon systems in Cuba.

3. It is not planned to schedule this report on the USIB agenda for discussion unless specifically requested by a Board member to do so prior to close of business 16 September. In the absence of such a request, it will be considered for record purposes that USIB "noted" the subject report on that date.
